

EuroSkyPark and Eutelsat Group – A Future Defining Partnership

Graphik: Eutelsat Group

Pioneering connection technology now pairs with global coverage, offering exciting possibilities for anyone seeking high-performance, blackout-proof satellite data connections. This exclusive partnership between two industry leaders combines the finest products and cutting-edge technologies available, setting a new benchmark in satellite communications.

For over 20 years, EuroSkyPark has provided customers with a versatile combination of project planning, installation, and custom-developed hardware for secure satellite-based data transmission. Renowned for its highly specialized solutions, the company has established itself as an industry pioneer, steadily strengthening its position as a market leader. Today, its focus extends beyond fail-safe SCADA data transmission to include broadband applications tailored to industries and manned offshore platforms. Now, EuroSkyPark is entering an exclusive, in-depth partnership with Eutelsat Group—one of the world’s largest satellite operators—to

deliver even greater performance and seamless global coverage for its customers.

GEO and LEO: Global coverage and low latency

Eutelsat Group operates a unique fleet of cutting-edge GEO (Geostationary Earth Orbit) and LEO (Low Earth Orbit) satellites, designed specifically for the industrial sector. In the geostationary category, the Eutelsat Konnect Very High Throughput Satellite (VHTS) delivers enhanced coverage with a total capacity of 500 Gbps (forward and return channels), providing high data

throughput across coasts, oceans, and airways. Meanwhile, the Eutelsat OneWeb LEO satellite fleet offers ultra-low latency of under 100 ms, making it ideal for sensitive real-time applications. Both systems deliver impressive bandwidths of up to 200/32 Mbps during standard operations.

Security in all project phases

“For our highly demanding customers in critical infrastructure and energy sectors, this partnership enables us to deliver comprehensive, worry-free solutions tailored to various applications,” says Thomas Maul, CEO of EuroSkyPark, highlighting the added value. “We combine top-tier performance with black-out security and seamless implementation.”

About Eutelsat Group

Eutelsat Group is a global leader in satellite communications, delivering connectivity and broadcast services worldwide. The Group was formed through the combination of the Company and OneWeb in 2023, becoming the first fully integrated GEO-LEO satellite operator with a fleet of 35 Geostationary satellites and a Low Earth Orbit (LEO) constellation of more than 600 satellites. The Group addresses the needs of customers in four key verticals of Video, where it distributes more than 6,500 television channels, and the high-growth

Cyril Dujardin, President of the Connectivity Business Unit at Eutelsat Group, shares this enthusiasm: “We are excited to collaborate closely with EuroSkyPark and to bring our GEO and LEO solutions to the onshore and offshore energy sectors. EuroSkyPark’s customers demand reliable, always-on connectivity with a strong emphasis on stability and data security for critical infrastructure. Eutelsat Group is proud to integrate our solutions into EuroSkyPark’s portfolio, supporting business expansion into new regions while delivering enhanced value to customers.”

connectivity markets of Mobile Connectivity, Fixed Connectivity, and Government Services. Eutelsat Group’s unique suite of in-orbit assets enables it to deliver integrated solutions to meet the needs of global customers. The Company is headquartered in Paris and the Eutelsat Group employs more than 1,700 people across more than 50 countries. The Group is committed to delivering safe, resilient, and environmentally sustainable connectivity to help bridge the digital divide.
